

Raw pub_count, Quadratic – 2-Class Solution

BIC = 10559.6 | AIC = 10537.7 | Entropy = 0.994 | AvePP = 0.998
Y-axis capped at 15 (95th pct). Points = observed class means.

Raw pub_count, Quadratic – 2 Classes – Individual Panels

Line = predicted. Points = observed class means. Y-axis free per panel.

Quadratic Term (b.) by Class – 2-Class Solution

Negative b. = inverted-U (peak then decline). Positive b. = U-shape (dip then rise).
Label shows career year of peak (inverted-U) or trough (U-shape).
